

1. Clear Safari Cache

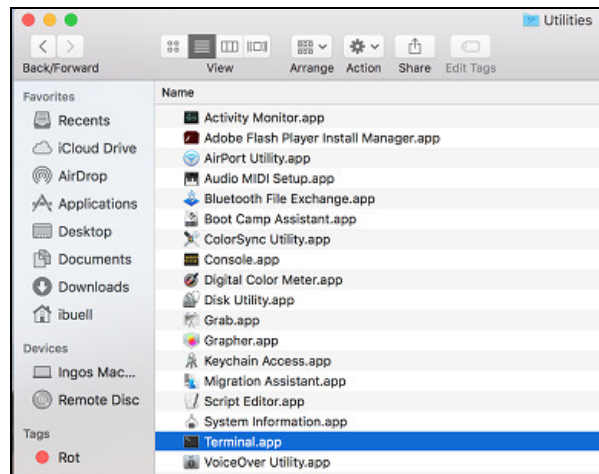

IMPORTANT: Clear cache before installation!

Press **cmd+alt+E** (E as upper case!!) on your keyboard.

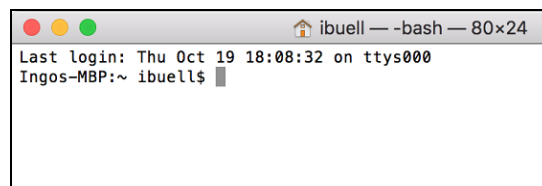

2. For MacOS 10.x (Sierra) only

Open the **Terminal app** from the **/Applications/Utilities** folder:

1. Open **Finder** and click **Applications**.
2. Search folder **Utilities** and open folder.
3. Double click onto **Terminal.app**

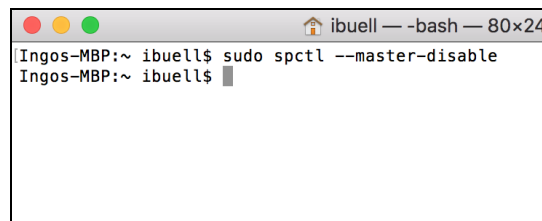

Terminal.app looks like this now:

Goto cursor and type:

```
sudo spctl --master-disable
```

Type **Return** and input your password if requested.

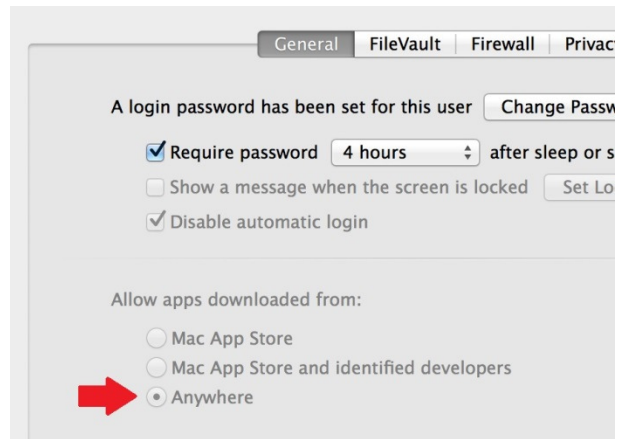

You will not see password while typing. Press Return to commit password.

3. Prepare Installation

Prepare your Mac computer for downloading files from the internet.

Open **System Preferences** folder **Security & Privacy** tab **General**.

Allow Apps downloaded from **Anywhere**.

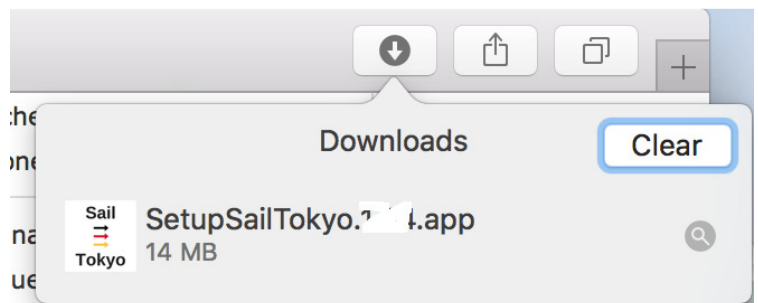

4. Install SailTokyo

Download selected Mac OSX product from our website www.buell-software.com page products.

Open list of downloads at the top right corner of browser form.

Double click on the app you intend to install.

Installer **SetupSailTokyo** starts.

Press **Install**.

5. Start SailTokyo

Open **Launchpad** on your Mac.

Find icon SailTokyo.

Single click onto icon to start SailTokyo.
