

## ***GESTURES***

### **1. Move Map**

#### **Windows, MacOS**

Press left mouse button and hold. Move mouse to move map.

#### **IOS, Android**

Tap finger onto map and move while finger is pressed down.

### **2. Zoom Map**

#### **Windows, MacOS**

No gesture, use buttons to zoom in, out, to track or home.

#### **IOS, Android**

Gesture is currently off due to performance requirements of painting maps while zooming.

### **3. Move Marks**

#### **Windows, MacOS**

Double click near movable mark until red circle appears.

Single click anywhere onto the map and move mark by holding mouse button down.

Terminate gesture with another double click anywhere on the map. Note that gesture *Move Map* is off while moving marks.

#### **IOS, Android**

Double tap finger or long tap onto map near mark to start gesture.

Note that double taps are no longer supported since iPhone 6S and up.

Similar to windows a red circle indicates the selected mark. Move mark by moving finger over the map. Switch gesture off performing another double tap or long tap.

## 4. Move Course

Gesture Move course is **not** supported by **The Solent 2016** applications or Apps.

### Windows, MacOS

Double click left mouse button near the middle of the connecting line between the marks.

The entire course is marked with a red circle and ready to move.

Proceed like moving single marks and end gesture with another double click.

### IOS, Android

Double tap or long tap near the middle of the connecting line between the marks.

The entire course is marked with a red circle and ready to move.

**Note that double taps are no longer supported since iPhone 6S and up.**

Proceed like moving single marks and end gesture with another double tap or long tap.

## 5. Zoom Course

### Windows, MacOS

Not supported.

### IOS, Android

Double tap or long tap near the middle of the connecting line between the marks.

The entire course is marked with a red circle and ready to move.

Note that double taps are no longer supported since iPhone 6S and up.

Use two finger gesture anywhere on the map to change diameter of course.

End gesture with another double tap or long tap.
