

Round The Island Race

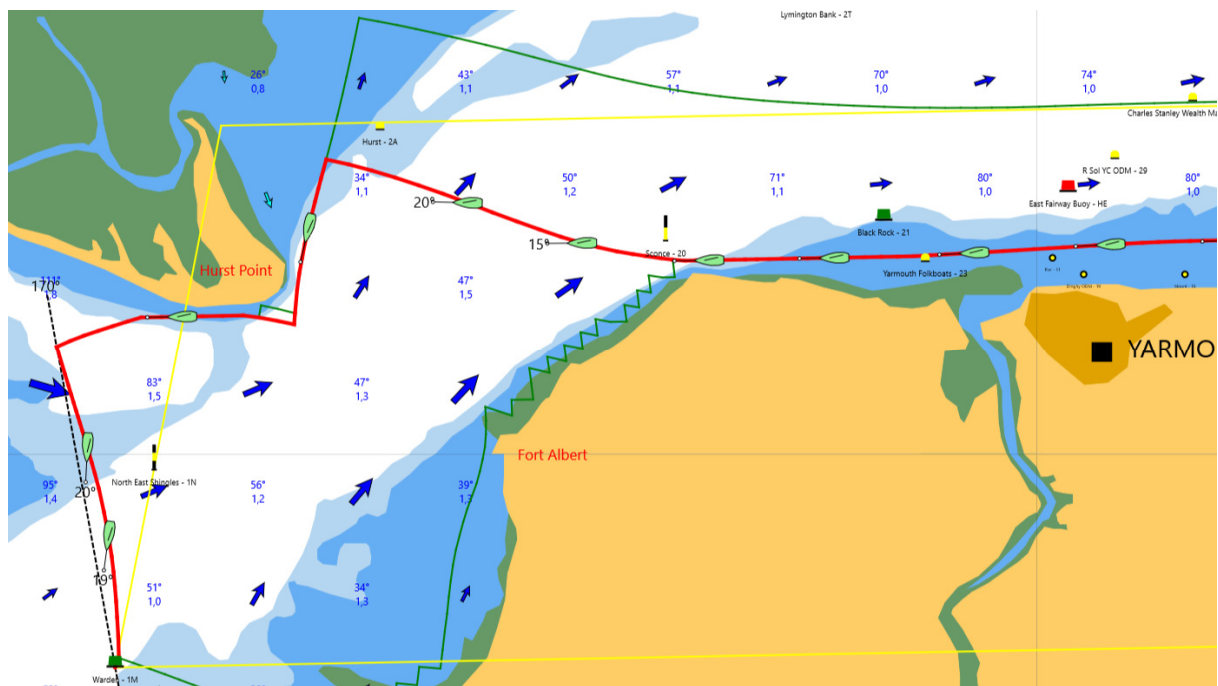

How to get the best overview over the currents:

If you listen to famous competitors of the Round the Island Race, they all agree on one thing: It is essential to have a good understanding of the tides. “In a tight class, getting the right side of the tide can make a huge difference, particularly on the way down to the needles and then back into the finish.” (Alex Mills, Invictus, Kerr 40+)

If you look for an easy way to check the tides on the Solent at any time of the race and even to find the fastest routes for your boat: Here’s a genius way to have all this information on your iPhone or iPad: [Race Area Analyzer – Solent 2017](#)

There’s also a [full software version](#) for Mac or Windows that offers many more options including an interface for GRIB wind data.

The red line shows the fastest course and includes tactical information like angle of attack. The green lines show the alternative laylines. You can check the advantage of one route versus the other plus all other vital data in figures. All together the apps give you a comprehensive overview.

The apps for iPhone and iPad are currently on a discount – especially for Round The Island Race. Especially to make **you** faster!
